

SPACE PAK 

PRESERVING ARCHITECTURAL INTEGRITY

Turn this...

Into this.

*The **Original** High Velocity
Central Air Conditioning System*

*Problem:
Unsightly, inefficient and noisy
window air conditioners.*

SPACEPAK PRESERVES ARCHITECTURAL INTEGRITY... INSIDE AND OUT.

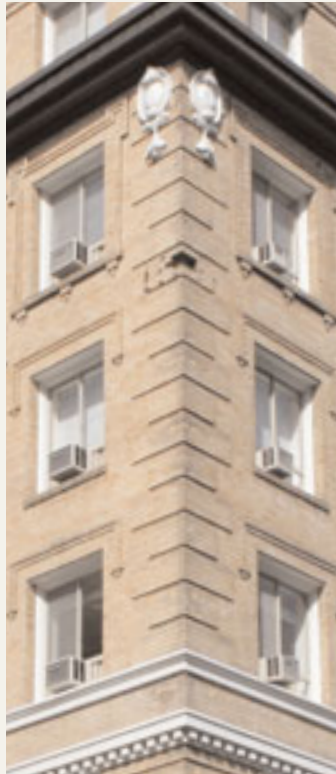

The high velocity central air conditioning solution for institutional buildings.

A SpacePak central air conditioning system can restore an exterior of unsightly window AC units back to its aesthetically pleasing facade, while providing total comfort with uniform, even temperature control and air distribution from floor to ceiling.

The easy-to-install system utilizes small diameter flexible duct that weaves around obstacles in walls, floors and ceilings without expensive renovations.

But SpacePak does more than put on a pretty face. It provides efficient, whisper-quiet performance with a proven track record of successful installations in a variety of light commercial and institutional applications including schools, apartments, libraries, museums, offices, municipal and historic buildings. It's no wonder that more building owners, architects and contractors specify SpacePak – the original high velocity central air conditioning system.

SpacePak eliminates unsightly and inefficient window air conditioning units while restoring building facades to their historic elegance.

SpacePak Commercial/Institutional Benefits

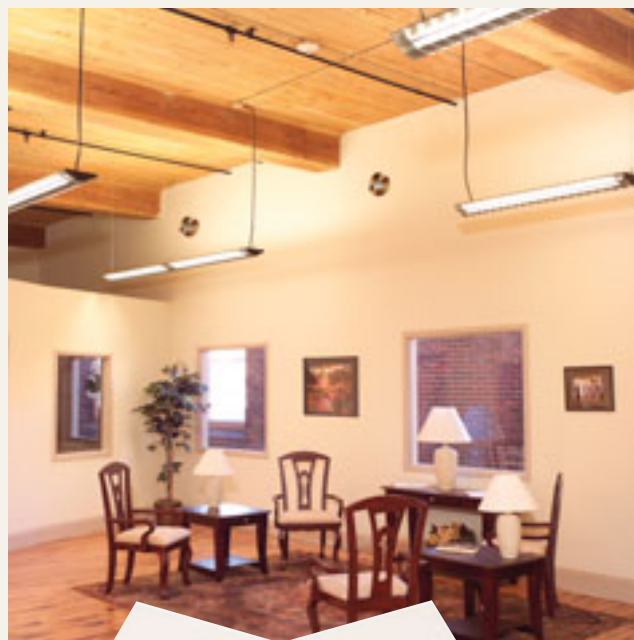

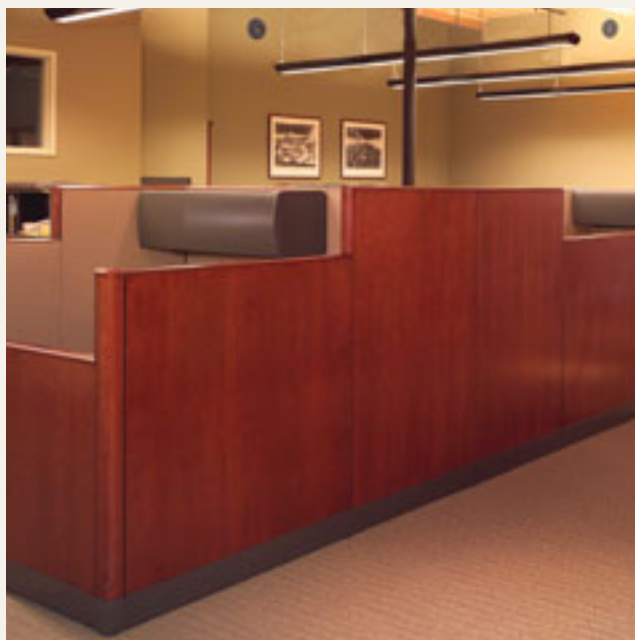

- Total comfort solution – cooling and heating
- Compact design conserves space – increases billable 'real estate'
- Energy recovery compatibility
- Reduces overall cooling load
- Lowers labor and equipment costs
- Quiet operation

Solution:

SpacePak provides central air for buildings not equipped with existing ductwork and restores architectural beauty by eliminating window AC units.

ARCHITECTURAL OUTLETS ENHANCE ANY INTERIOR DÉCOR

The SpacePak system features a variety of stylish architectural outlets that blend with any room interior. Mounted in walls, ceilings and floors, you can choose from finished aluminum and brass, Victorian elegance or natural wood. These small, low-profile components enhance the aesthetics of any interior design. A complete selector guide booklet is available that shows each outlet, pictured in color at full size.

Give your next commercial or institutional renovation a facelift with an easy-to-install SpacePak system – the total comfort solution for cooling and heating that is the choice of architects, contractors and building owners.
